

TC-G® and TC-120® HIDDEN FASTENING SYSTEMS FOR GROOVED DECKING

FEATURES

- Ultimate corrosion resistance. ACQ Approved
- Strong connection between decking and joists
- Requires no special tools
- TC-G fits most 5/4" grooved decking
- TC-120 fits 3/4" hardwood decking with no predrilling

PACKAGING QUANTITIES

TC-G, 50 sq ft bag with hand driven screws, 500 sq ft bucket for use with pneumatic gun
 TC-120, 50 sq ft bag with hand driven screws

DESCRIPTION

Tiger Claw TC-G and TC-120 clips are the easiest way to install grooved decking. Use the Tiger Claw Pneumatic Installation Gun for the fastest possible installation.

Create grooves in non-grooved boards with the TC-G or TC-120 slot cutter.

COMPLETE HIDDEN FASTENING

Combine the speed and ease of the Tiger Claw TC-G for the field of the deck with the versatility of Cortex for first board, last board, perimeter boards and stairs to get a beautiful fastener-free surface.

TC-G

TC-120

INSTALLATION PROCEDURE

Fully insert TC-G or TC-120 clip into grooved edge of deck board. Screw hole should line up with the center of support joist. While standing on deck board, install provided screw at 45° angle through clip and into joist. Install one fastener and screw at each support joist.

For more detailed information, please refer to our TC-G/TC-120 installation instructions included in all packaging as well as Ask the FastenMaster Installation Video for Complete Hidden Deck Fastening with TC-G and Cortex is available on our website.

INSTALLATION TOOLS/ACCESSORIES

Pneumatic Installation Gun

The Tiger Claw Installation Gun is a semi-automatic installation tool that greatly increases the installation speed of TC-G clips.

This tool can also be used with TimberTech® CONCEALoc™, Cali Bamboo®, Clubhouse™ Connect Clips and Trex HideAway™ fasteners.

Ask about our First Time User Program

Collated Pneumatic Screws

For use with the pneumatic installation gun. Available in coated and stainless steel.

Stainless steel clip used in conjunction with TC-G.

Butt Seam Clip

Slot Cutters

For non-grooved boards, use the TC-G or TC-120 slot cutter to create the correct groove for each clip.
