Landscape Bed Edger Model BE400

The Bedscaper BE400 bed edger has more power and the added durability of a centrifugal clutch that is bathed in oil. Depth adjustment is controlled at the handles as well as the throttle. **The BE400 can also trench 7" deep!**

Specifications:

- **Depth Control**
Cutting depth is adjustable via handle mounted controls. This allows for conveniently alternating cutting depths of 2, 3 or 4" or transport position. Depth control on handle on BE400 model.
- **Superior Maneuverability**
Caster steering allows unrestricted turning radiuses for you to create unique and beautiful curved bed shapes.
- **Pneumatic Tires**
Rolls easily over terrain.
- **Compact**
A fully adjustable and folding handle allows for easy storage and comfortable working height. Fits into a space 33"L x 27"W x 17"H.
- **Diversity**
Easily convert to a cable installer which is great for installing hidden pet fencing, low-voltage landscape lighting and control wires.
- **Powerful Performance**
A oil-bathed centrifugal clutch provides consistent performance and reliable power with a GX200 Honda engine. Carbide-tipped

Uses:

- Create Beautiful Curved Landscape Beds
- Redefine Existing Beds with Precision
