# Bandit Model 150XP Disc Chipper

**The Model 150XP** is the most compact of three 12-inch class chippers available from Bandit.

This unit has been designed for those who want an economically priced 12-inch capacity chipper that can easily be towed.

The Model 150XP features a 14" X 17" chipper opening and has a 45-inch wide infeed tray.

Rugged construction and a powerful feed system are keys to this chipper's ability to process trees and brush with limited trimming. The Model 150XP is a chipper for those tree services, rental companies, and Councils wanting to chip brush, limbs, and some whole trees.

The Model 150XP features a feed rate of 90 feet per minute and will easily keep your crew busy feeding it! The powerful 10 5/8" dual feed wheels pull and compress limby material into the chipper. This unit can also be easily maneuvered into tight residential areas, allowing for greater versatility.
