

DS3011 INSTRUCTIONS

- 1 When using coolant, always use a ground fault circuit interrupter (GFCI)
- 2 Plug power cord into 110V, 60Hz, 20 Amp GFCI
- 3 Set tool on its edge or side, rotate the platens by hand to check for rotation
- 4 Apply desired abrasive system to platens
- 5 The speed control is permanently set on “6”.
- 6 Turn on switch, planets will rotate at 2100 rpm.
- 7 DO NOT use with silicon carbide grinding stones or diamond cup wheels over 1.5 Lbs.
- 8 Rinse machine after every use and store with the platen side down to drain.
- 9 Service machine every six months, depending on usage. Call for advice.
- 10 IMPORTANT: Always use a vacuum when grinding DRY.

The DS3011 is a versatile tool, here are just a few uses:

Hone and Polish	Limestone, marble, granite, glass, concrete counter tops, stairs, walls, plastic
