*The PANELLIFT® Drywall Lifter is ergonomically designed to **save your back**. One person can easily transport, assemble, and operate each model of the PANELLIFT®, making drywalling a **one person job**. No tools are required for assembly. Dismantle the unit and put it into the trunk of your vehicle for easy transport to your next job site. The tripod base folds to allow the assembled unit to pass through doorways. The PANELLIFT® is made in the USA using all-steel construction to handle commercial work loads.*

THE DRYWALL LIFTER
PANELLIFT®

One person is all you need.

Model 138-2

The original PANELLIFT® Model 138-2 is the industry's leading drywall lifter.

Why struggle with wallboard when you can single handedly lift wallboard up to 11 foot walls and ceilings. Cradle tilts laterally 65° for easy loading and for installation on walls and sloped ceilings. It also tilts longitudinally 10°. Fast action, single stage winch easily lifts and lowers wallboard so you don't have to strain your back!

You asked for it, we did it!

We improved the design of the PANELLIFT® DRYWALL LIFTERS. The upgrades are reflected in the pictures below. The upgrades reflect our greatest effort to improve our products to meet customer expectations and exceed the industry standards.

Jam resistant Tripod Base simplifies assembly / disassembly.

Heavy duty Frame Base and Center Leg stand up to heavy use.

Easy action Cross Arm release simplifies and speeds disassembly.

Always the right choice.

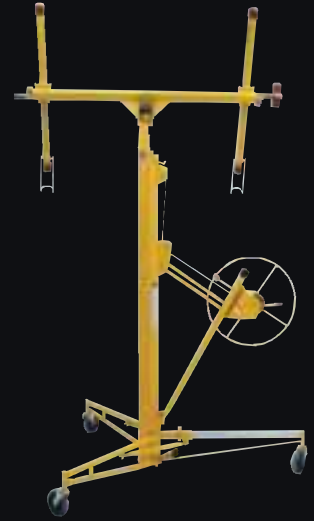

THE DRYWALL LIFTER
PANELLIFT®

Model 182

Specifically designed for those extra tall jobs, the PANELLIFT® Model 182 has the same great features as the original Model 138-2 with the added benefit of a higher standard reach. The maximum standard reach of the Model 182 is 15 feet. (16'6" with optional Extension 154)

Model 460

The fastest lift available, bar none! The PANELLIFT® Model 460 is the undisputed ruler of the trade with a patented DC / Hydraulic chain-driven lift mechanism that sets a whole new standard for productivity, versatility, and ergonomics. With the Model 460, you can lift a sheet of drywall to 15' in about 8 seconds at the flip of a lever. An easy loading height of just 40" makes the Model 460 the smart choice when high-volume, all-day production is required. Two batteries and charger are included.

ACCESSORIES

For 138-2 or 182	Transport & Storage Cart Model 110 Keep your Model 138-2 or 182 safe and secure. Transports easily and stores upright in a compact area.
For 138-2	Extension Model 186 Interchange with standard telescoping sections to increase reaching heights to 15 feet for the Model 138-2.
All Models	Extension Model 154 Add on to standard telescoping sections to increase standard reaching heights an additional 18 inches.
All Models	Loader Model 195 Alleviate back strain by turning your PANELLIFT® into a complete floor-to-ceiling drywall installation system.

The optional PANELLIFT® accessories are inexpensive upgrades that increase the lift and make installations easier and efficient.
