Bandit Model 990XP

- 24" DIAMETER DRUM
- 5,200 LBS (WITH 84.5-HP ENGINE)

12" CAPACITY DRUM-STYLE CHIPPER

PRODUCT OVERVIEW:

THE MODEL 990XP is a compact 12" diameter capacity drum chipper specifically designed for municipalities, rental companies, and tree services looking for a high-performance lightweight chipper. The feed system and components on the 990XP are comparable to our larger Bandit drum chippers, but with a smaller 24" diameter drum, a unique discharge transition, and a compact design. This unit comes equipped with the quality and performance you come to expect from a Bandit chipper. The compact design of this unit allows it to easily be transported from one location to the next.

A HIGH-PERFORMANCE, LIGHTWEIGHT CHIPPER.

Built to Last

All steel components on the 990XP are welded together for durability and longevity.

Slide Box Feed System

This system with down pressure springs eliminates the areas where material can hang up in the feed system.

Compact Footprint

The 990XP offers the power and torque of a large diameter drum, with the compact frame of a 12" chipper.

OTHER UNITS YOU MAY BE INTERESTED IN:

Bandit Model 1390HD

The key to the 1390HD's efficiency lies in the oversized 37" diameter drum. This drum is a full 15" larger than many of its competitors, maximizing its chipping and fuel efficiency. By offering a larger diameter drum, more of the material is cut with the grain of the wood, as opposed to against the grain, thus reducing the horsepower needed.
