GAP POWER

CHIMNEY SWEEP BRUSH SET

Instruction

1. **Measure flue size.** Take inside measurement.
2. **Select brush size.** Measure the chimney carefully before selecting a brush. An oversized brush will become lodged in the chimney; an undersized brush will not clean effectively.
3. **Choose a cleaning method.** The best way to clean is with the Flexible Rod method.

Cleaning Methods

Flexible Rod Method

Brush-Rods

Insert brush top down through chimney, bottom up through fireplace damper or cleanout door.

Bottom Up

Listing

Shape

1/4" NPT
Male Thread
(US)

Round

BR0217-A 3" (Pellet
BR0218-A 4" Stove/Dryer
vent style)

BR0181 6" (Poly for
BR0182 8" use in
Stainless)

BR0183 6"
BR0209 7"
BR0184 8"

Square

BR0330 6" x 6"
BR0210 7" x 7"
BR0185 8" x 8"
BR0131 12"x12"

Rectangular

BR0211 7" x 11"
BR0186 8" x 12"

Dual Line Method

Brush-Line-Loop

Requires one person on roof, one below. Lines are attached to both ends of the brush. Brush is pulled back and forth.

Line & Weight Method

Brush-Line-Weight

Employed when chimney openings are restricted. Weight is attached to loop.

Note: Not to be used on Pre-Fab chimneys.
