Don't let cutting those tough branches get the best of you. For those hard-to-get-to trees, the HT 101 STIHL telescoping pole pruner will take you there. Powered by a low-emission engine, its shaft adjusts from 7 ft. 6 in. to 11 ft. 6 in. — allowing professionals to reach branches up to 16 ft. above the ground.

Standard Features

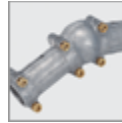

- Powered by a [proven low-emission engine](#)
- Telescoping-shaft pole pruner
- Automatic bar and chain oiler
- Side-access chain tensioner
- 12" PMMC3 STIHL bar and chain
- [View standard features common to all STIHL pole pruners](#)

Optional Accessories

- Basket-style carry harness
- HT carrier support system

IMPORTANT INFORMATION

Danger! Risk of Electrocutation

Pole pruners are not insulated. Approaching or contacting electric power lines with these tools may cause serious injury or death from electrocution. Electricity can jump from one point to another by means of arcing and/or may be conducted through damp branches. Maintain a clearance of at least 50 feet (15 M) between the tools and any electrical line carrying a live current. To reduce the risk of injury from falling objects, do not cut vertically above your head. Always wear appropriate protective apparel as outlined in the instruction manual. Keep bystanders away. Use only STIHL authorized cutting attachments.

WARNING!

Improper use of any power tool may cause serious or fatal injury. Read, understand and follow carefully the operating and safety instruction in your instruction manual before using these products.

STIHL products sold through U.S. STIHL Dealers are for distribution in the United States only.
