

Powered Full Tilt (TF)

Weight: 22 ft - 3,820 lbs

Lengths Available: 18' - 24'

Deck Height: 22"

GVWR: 14,000 lbs Bumper Pull - 15,680 lbs Gooseneck

Standard Hydraulic Power Up & Down

Our Powered Full Tilt (TF) comes standard with a locking toolbox that encloses a KTI™ Hydraulic Pump & Interstate™ deep cycle battery. This self contained hydraulic unit powers twin 3" x 16" cylinders through Parker™ fittings and hoses to raise and lower the deck. This combination of professional grade components makes our tilt ready for years of reliable use.

Knife-Edge Tail

Our 30" diamond plate knife-edge tail makes it super easy to load low clearance equipment like scissor lifts and fork lifts. The tail lays flush to ground eliminating the "bump" other tilts have to drive over. This is especially useful when loading equipment with small wheels, winching vehicles on to the deck, or loading in wet/icy conditions.
