Since 2007 Montana Post Driver has been revolutionizing the fencing industry. As fence builders ourselves we believed there had to be something better in post drivers. We invented the hydraulic hammer post driver. Since then, we have refined and improved our post drivers.

**Key Features:**

- **Cupped Driving Head** - Domed cup driving head ensures centered driving for many post applications. Flat topped cup is also available.
- **Low Profile** - Doesn't tip over like others.
- **Multi Purpose Chain** - The chain acts as a plumb bob, it is adjustable as a depth gauge and is used to pull posts.
- **Very Low Maintenance** - Hours of hassle-free operation- only one grease fitting and two moving parts.
- **Auger Attachment** - Optional 4" diameter auger with carbide tipped head. Features standard 2" hex connection. Fits on all Montana Post Driver models.
