

PICKUP BROOM SERIES 2

The Blue Diamond® pickup broom is designed for heavy commercial use. This simple, clean design gives added structure to typical wear areas and damage prone components such as a built in water kit, and heavy reinforcement on the front of the broom shroud. The low profile water tank allows the operator better visibility of the work area thereby reducing accidents. The 26" diameter poly or poly/steel broom is available in 60", 72", 84" and a 96" width. A bolt on 3/4" double bevel edge protects the 3/4" weld in edge from wear and adds strength the leading edge of the bucket. Wear bars welded to the bottom of the bucket provide strength and protect the bucket from premature wear.
