<hr/>		
ALR-5' Steel:	Length 57"	Weight: 16 lbs.
ALR-5' Aluminum:	Length 57"	Weight: 9 lbs.

EDCO's Air-Powered Chisel Scalers use a rapid, hammering action to quickly chisel away the material you're removing. These air-power units eliminate hammers, handchisels and many hours of labor. Various accessories are available for the chisel scalers enabling contractors to easily remove tile, grout, ice, fiberglass, concrete, asphalt, roofing shingles or hardened deposits.

EDCO's TileShark™ Floor Stripper has an oscillating blade drive system that allows it to slice under the material making the removal easier and quicker.
